Macro Utility offers a comprehensive range of functions that can be used to automate repetitive operations. Use the keyboard to launch the program from a specified folder (while using it, hold down the Command key), then select the file you wish to use (or specify its path in the File's dialog box) and press Enter. The selected file will be opened, and the program will take care of the rest, including saving the changes, clearing the intermediate cache and updating the folders affected by the operation. As long as the file has the same file name (minus the '.macro' suffix), it can be duplicated, moved or renamed without causing problems. The utility can also be used to convert documents to another format, such as PDF, JPG, DOC, etc., or to analyze files.
