## SnipDock [32/64bit]

Stay focused with Snapshot: Snapshot your desktop so that it's always at hand. Easily view it, even if you have no applications open, and easily reset it to the desktop. Speed up your workflow: Snapshot creates a free-hand screen capture that is saved in your Pictures folder. You can add a comment to the screen capture for added detail. To take a snapshot, simply point and click. Discover your potential: Use Snapshot to take screenshots at any time. Each snapshot has an overview that lists all snapshots and an 'undo' button that allows you to restore a previous screen capture. And it's really simple to add a comment to the screen capture for added detail. Reference: SnipDock is a lightweight and straightforward software solution that offers you the possibility to snapshot an area of your desktop, then keep the image on top of other windows. This way you can continue working on your computer and view that image without changing between windows. Clear-cut interface The installation process runs smooth and fast, not bringing any surprises, so in no time you can use SnipDock. The application features a simple and intuitive interface that is docked on your desktop. You can change its position by selecting it to be docked on the left or the right side, as well as selecting the float option so you can move its main window wherever you want. Easily capture the desktop After you click on the Snip Screen button you can select the area of the desktop that interests you, then SnipDock automatically snapshots it and displays the captured image. No matter the size of the area you select to capture, SnipDock will adjust its window accordingly, but you can also zoom in and out of the picture using the mouse wheel or scrolling with the touchpad. All the created snapshots are saved in your Pictures folder and you can disable them to be displayed on the SnipDock's interface after you captured the images. The software solution provides you with the possibility to clear the snapshot from the main window when you don't need it anymore. Conclusion To sum things up, SnipDock, with its clean interface, was specifically designed to help you create snapshots that you can easily view, since they are displayed on top of other windows of any applications, even if they are maximized. Description: Stay focused with Snapshot: Snapshot your desktop so

## What's New In SnipDock?
