What's New In?

It enables you to gain or control the volume of multiple audio tracks in real time. It is compatible with Blue Cat's Audio Projector and Blue Cat's Gain Suite XPro. The volume of each audio track is available in real time for all your tracks in your project. Every track can be analyzed in order to control its gain or volume. It has various keyboard control modes, from simple dedicated keys, to MIDI learn control. It is also possible to link multiple instances of the same plug-in. The gain of multiple tracks can be controlled at the same time by using a unique slider. It has a standard stereo version, a mono version and a version with mid/side capabilities. With this plug-in, it is possible to widen or narrow the stereo tracks in the project, because it is possible to control the left and right or mid and side channels individually. This plug-in is compatible with the Blue Cat's Audio Projector for Windows (x64), Audio Hijack Pro (x64) and Audio Studio Suite (x64) and also with Blue Cat's Gain Suite XPro (x64). Blue Cat's - Free Audio Editor Software Blue Cat's Free Audio Editor Software is a comprehensive music editor software which supports all major audio formats and hardware.
