The program allows saving macros that contain multiple keyboard commands and automatically executes the commands when a single keystroke is entered. Users can make macros using a friendly interface, and the program will convert the macro into the format compatible with the Notepad++ macro editor. In addition, the created macros can be saved to the program's configuration file. After the user selects the macro to execute, the program will execute all macros in sequence. After the macro is saved, the program will automatically execute the macro every time the user types the stored keystroke. OSPRE: Description: This project is a cross-platform, command-line programming application that utilizes the Open Sound Control (OSC) protocol to write scripts that perform complex tasks. This program can be used to simulate the commands from devices like a touchpad, mouse, joystick, or a keyboard, to automate common tasks. This program can also be used to create specialized commands for your own applications. The best way to think of OSPRE is as a super version of the rc.local script that you edit in the /etc/ directory, except, you can pass more complicated commands. If you are interested in using the command line, we recommend you watch our introductory videos about Linux command line on Youtube. If you like our tutorials, please subscribe, rate, and comment on our videos. Thanks! OSPRE info * OSPRE supports all default Linux and Apple operating systems. * Each OSPRE command will be saved to a configuration file so that you can execute commands easily. * Each OSPRE script can contain multiple commands and the programs run in sequence. * It's easy to use, you can create new scripts or edit the existing ones with the included OSPRE text editor. * With OSPRE you can run commands at startup or wake-up in Linux or start programs in Mac OSX. Fringe Remover is a graphics editing utility that comes with several advanced features for preparing PNG images for osu! skinning and editing. It is developed and maintained by osu! technical specialists to provide players with a perfect input/output mechanism for their skin graphics. Features: Flinging Fringe: During the design of custom skins in PNG format, fringing artifacts can occur when the output image is cropped. This will cause them to appear on the screen. To get rid of it, the Fringe Remover application is designed to remove them and improve the quality of the image. The app requires the user to either prepare input and output locations for their skins, or to indicate them directly. Saving PNGs: When using PNGs to represent custom skins in osu!, it is recommended to avoid the default settings and to adjust the quality to 10, just as the app does. For most skins, when the output will be saved as a PNG format, it is suggested to directly open it up in the Fringe Remover tool and either tick the Extract Alpha checkbox, or to save the image to another location as a PNG file and disable the Alpha Chunk. With that, Fringe Remover is now available in the Store as a permanent free download. With this tool, osu! developers and modders can work on skins even more efficiently and in the most convenient way, freeing up time that would have otherwise been consumed in manually cleaning up the PNG images. A free version of osu! Themes - Seasons, now out! In the last part of the 'Overwatch' season, we see jolly animated banners adding flavour to the in-game experience in osu!. This time we're showing you two new characters and two new skins for the game. This will be the last time for the season, as we're moving on to the next season in September. As per usual, we'd like to see as much feedback from you as possible regarding these new themes. Feel free to share your thoughts in the comments section, as well as mention the current theme your favourite. osu! Comic Show #5 With the fifth episode of the osu! comic series released today, the fans were treated with a brand new skin that comes with some new animations and effects. The skin is inspired by legendary Cartoon Network show, Steven Universe. In addition, we have a new comic, ready to read and laugh
