Imagine a beautiful quiet lake among the green mountains. The very old oak tree grows on the small island at the midst of the water. This is the Magic Tree. Only one night of the year the strange appealing halo surrounds it, emitting colourful sparkles. This night Magic Tree will grant the wishes of everyone who walk under its krone. Do you want the execution of all your desires? Requirements:

DirectX 8 Thursday, 30 September 2007 My First Adventure Game This is my very first adventure game made in personal project. Well it was not exactly game since it was not an open environment. I wanted to make a small game where the player has to find a way to the exit. To do so he must find the right key under the floor that has the exit. This game was only tested under windows. I hope to make a good one under linux. Monday, 27 September 2007 Christian Mudkip Hunter Well, I was really impressed with the creepers' behavior. In some way I was thinking that it was simple to become a hunter of these creepy animals. Now I must figure out how to control them. I had actually a lot of pleasure to create this game. The game is not finished yet. It is very good to have the time to work on a videogame. Sunday, 26 September 2007 Femme Fatale I only started yesterday to finish this game and I already finished it. Many changes were made in the game. I must admit that I had difficulty on the graphics and the sound but I think that it was very rewarding to finish this kind of project. It was a kind of stress :). Thursday, 23 September 2007 Dictator Monster I think that this game is very interesting to play. It is a strategy game in which you have to destroy all the people on the map with your dictators. When you destroy a class, you must rule it with a capital letter and destroy all who are with it. The game is very addictive and I think that it was a good learning experience for me. Wednesday, 22 September 2007 Luna Love This game is very easy to play. It consists of only one type of monsters. You must shoot them. After that the game is over. I really don't know why I made this game. Perhaps I had fun playing it. Monday, 20 September 2007 CoolMania Today b7e8fdf5c8
