Review 4,8 A great song that makes me remember my life July 13, 2017 A great song that makes me remember my life I was 10 years old when I gave birth to this song, I was no longer a young woman, but that didn't affect my feelings, because I still live my childhood like a child!The machining of parts by means of a tool is known from many technical publications, for example, the books of H. Michaelisch, J. G. Bennett, L. D. Bickman, F. Roux, M. Schmidt, 3rd Edition, C. Lange & K.-D. Lüke, Osnabrück, 1988, and also the Japanese publications: SIKAN; Seikosha; Denso; Hitachi; Makita; Planer; SENZO, as well as the GESCHUTZ-Praxis-Dia&Nach. The terms cutters, milling cutters, cutting tools and the like are used in both German as well as English language publications as terms denoting the tools. As "tool" in the following the term is used to denote all such machining tools, whereas the term "cutter" denotes the tools cutters. The "insert" in the following is understood to be the "insert region" of a cutter. "Insert region" is the region of the cutter where the cutting takes place. Tools which are used in cutters for the milling of the parts are, in general, made from cemented carbide and have a single chip blade or are, respectively, provided with two blades. Machining tools with hardened cutting edges are frequently used in the machining of parts due to their excellent wear properties, and are also called "Liang's" tools, since in a statement by Liang Shou-Tang from 1962 the properties of such tools are presented in detail. In a "Liang's" tool the cutting edges are hardened on a support. The hard metal is deposited on the support in the form of a powder, either by electroplating or by vacuum cooling.
