I want to: Windows Server 2008 R2 8 files: idx index.txt sqlite3.exe nTLogSvc.exe installers.msi sqlbackupandftpkeygen (the.exe files) (1 file) I need to combine the.exe files into one.exe file, with or without the.txt file. The.txt file needs to be stripped of formatting, and converted to a tab delimited text file. A: convert -verbose inputfile.exe | sed -e's/\.exe\$//' -e's/\.txt\$//' > out.exe This will remove the extension from the file names and strip out the.txt extension. The -verbose flag to convert displays the output to stdout and allows you to see what is being converted. If you want to redirect the output to a file, add the -o out.exe. sed is a stream editor. It will let you take a stream of data (the result of -verbose) and change the first part to the second part and the second part to the first part in a row. To explain what is going on... The -e's/\.exe\$//' will take the string from the end, up to, and including, the first occurrence of the string ".exe" and remove it. The -e's/\.txt\$//' will remove the ".txt" string. The shell will then output the result of the operations to stdout and also to the file out.exe. Q: Как использовать составное имя сети в IP? Не прошу помощи, но я совсем не знаю, как можно это решить. Есть сети(серверы) название(домены) которые не заданным об
