Extract to Where: C:/Users/Desktop/Downloads then again. Make sure that you run the game from the "Downloads" location, rather than the "Steamapps" location.... run config.cfg as admin; there's a wine configuration, I don't know what that's for, but just follow the instructions as it tells you.... Also don't use the "Failsafe" default settings - you want "Extra" or "Fast" settings. Okay, so I got the patch. The patch in config.cfg has now been renamed as "winecfg"; because my preferences are now named "WinePrefs"; and because I have my game under "WineApps"; rather than under "SteamApps"; I had to modify the winecfg patch.... Open winecfg again, and name the "IOS" folder "WineApps"; change the "Gamemaker Version" in the "Games" tab to "IOS"; and also change the "Allowed Programs" list in the "Additional Information" tab to include "WWW.GOG.COM";... When I opened up my game in Game Maker, I noticed it was the latest version. So, I made sure that the game was at the place I wanted; so I exited; and I selected the "IOS" path as the "Working Directory";... Then in the "Working Directory", I right clicked "IOS"; and then I selected "Move"; and I moved the "GOG.com"; folder to the bottom, and then I closed the program.... Then, I copied over the "Gog.com"; folder.... Now, in the "Working Directory", I right clicked "IOS"; and then I

selected "Copy";... And now, I'm at the "WWW.GOG.COM"; folder; and I will be exploring.... I started up the game, and then I entered the code provided by my friend. Then, I was in control of my character.... I went into the map that I created; and I entered the code provided by my friend. Then, I saw that I had a few upgrades; and I was attacked by a few Skeleton warrior tributes; but I destroyed them all.... I went into a treasure area. Then, I killed the skeleton warrior....
