See more ideas about Gidwani, Drama and Five centimeter per second english. See more than 6.5. 5 Centimeter per Second Torrent for free. A young TV reporter deals with his own. Adf.Q: Write what you find in a text file to a text file i've got a script that writes to a xml file. i'm trying to make a button which rewrites the xml file. this is the code that i use to write to a xml file from xml.dom import minidom from xml.dom.minidom import Document def getContacts(): with open("NewContactsList.xml", "w+", encoding='utf-8') as file_in: file_in.write("") for item in NewContactsList: file_in.write(item) file_in.write("") file_in.close() contacts.set("contacts.xml") so now i'm trying to make a button which will do the same operation, but it doesn't work. A: Using write will re-open and rewrite the file, so when you call write inside the for loop you're just overwriting the text, rather than appending to it. Using write(str) will replace the contents of the file with the given string, so you can do the following: from xml.dom import minidom from xml.dom.minidom import Document def getContacts(): with open("NewContactsList.xml", "w+", encoding='utf-8') as file_in: file_in.write("")
