i saw over 50 of my favorite bands at this year's coachella festival and i want to hear more. i want to talk about what music means to me. i want to hear live music. i want to be able to explore all of the genres of music that i love, from pop to rock to hip-hop to classical and everything in between. i want the chance to connect with my new favorite bands and djs and talk to them about their music and their craft. i want the chance to hear new bands and djs that i might never have heard of otherwise. i want to be able to share my love of music with my friends. i want to get the music that makes me feel alive and make sure that people all over the world can feel that way, too. thats what we do at live365. we enable people to share and connect with their favorite music, and we put the power in the hands of the people. google chose austin for its fiber-optic network because of its entrepreneurial spirit and its friendliness to new technology, said dan bartlett, managing director of google fiber-austin. mark strama, a google executive, said that by the time that google fiber is fully implemented, austin should be able to boast of the fastest internet speeds in the nation. the goal is three-pronged: aside from the internet connection, the program will provide tech devices austin community college has donated 600 pieces of computer equipment for the first year alone. corporate sponsors are also contributing the ford and open society foundations have thus far provided \$300,000. lastly and arguably the most important, according to gerber the plan includes a digital literacy component coupled with science, technology, engineering, and mathematics (stem) training. for instance, google is subsidizing training at austin free-net, the eastside nonprofit dedicated to closing the digital gap. 5ec8ef588b
